

1 New East High School for Evergreen Public Schools

VANCOUVER

Evergreen Public Schools' New East High School was designed to offer a small-school atmosphere to the student population of about 2,000. Smaller schools are thought to provide better opportunities for students to complete high school and make better and earlier transitions into post secondary education. Evergreen Public Schools is working with the Gates Foundation and LSW Architects to build the 235,000-square-foot campus on 48 acres in phases. Four separate buildings will function as individual schools, and each student community will share a centralized gymnasium, commons, auditorium and media center.

Construction Cost: \$45 million

Start Date: August 2005

Completion Date: July 2007

Peak Construction Employment: 200

General contractors:
Todd Construction

Owner:
Evergreen Public Schools
